CITY OF WADSWORTH HYDRANT FLUSHING 2019

The City of Wadsworth Water Department will be conducting its annual fire hydrant flushing program during the weeks of May 6th and May 13th, 2019. The flushing of hydrants insures that all of the hydrants are in good working order and also aids in maintaining water quality.

The entire 'low side' system will be flushed during the 2019 program with flushing during those weeks to include College St. and all streets south of College; streets south of Broad St. and west of First St. On the west side of town, flushing will include the area west of High St. and south of W. Prospect to Leatherman Rd. Also included are all streets west of Leatherman Rd.

The water in the affected areas may become discolored during the flushing program. While it is safe to drink, it is not recommended that you wash clothes in it. Your water should clear up by the next day.

Thank you for your cooperation. Questions regarding the program may be directed to the City of Wadsworth Water Department at 330-335-2830.
