

2017 HYDRANT FLUSHING SCHEDULE

The Wadsworth Water Department will be conducting its annual fire hydrant flushing program during the weeks of April 24th and May 1st. Flushing during those two weeks will include the areas in gray on the map below.

For those who live or work in the affected areas, the water may become discolored during the flushing program. While it is safe to drink, it is not recommended that you wash clothes in it. The water should clear up by the next day.

The flushing of hydrants ensures that all of the hydrants are in good working order and also aids in maintaining water quality. Questions on the program may be directed to the City of Wadsworth Water Department at (330)335-2830.
